

## EDUCATIONAL GOALS

The Board recognizes the importance of the establishment and implementation of educational goals for each course of study required as a part of the state curriculum .

These educational goals are designed to provide a conceptual framework for each required course of study. This framework will serve as the basis for the instructional objectives presented to students in each course of study.

The Board is aware of the quality of the state-adopted Content Standards and believes that these standards will serve appropriately as the basic educational goals for each required course of study. Therefore, the Board designates the state-adopted Content Standards for each course of study as the initial educational goals. Local educational goals may be added to this initial list. All Hardy County educational goals will be subject to periodic review .
