

RESEARCH

The Board recognizes the need and value of educational research in developing, validating, and standardizing new programs and strategies in education. Staff members are encouraged to participate in, and cooperate with, such projects.

To avoid overlapping and duplications and insure that the results are available and adequately disseminated, all research and experimental projects using either staff, pupils, or materials within Hardy County Schools must be approved, prior to their beginning, by the Board. Results of all such research must be furnished to the Board.
