

PROFESSIONAL VISITORS AND OBSERVERS

The Board believes that one of the ways that board members and staff members can improve their effectiveness, and thus the quality of the education received by the students of the county, is through visitation of school systems and districts with novel, experimental, or innovative programs. For this reason, the Board has made it a practice to visit other systems throughout the country as time and finances permit.

It shall be the policy of this Board to welcome professional visitors to our school system. However, to insure the continuity of the educational program of our students, the Board requests that delegations desiring to visit our system, or any particular part of it, make arrangements through the county office. The Superintendent then can make the necessary arrangements to assist them in their visit.
